Example Output 1:

```
******************** DUOTECH EMAIL MANAGEMENT APPLICATION ********************
--------------------------------------------------------------------------------
How many emails would you like to generate today?: 2
Creating the email #1...
Choose the type:
1.Student
2.Staff
1

First Name: Bahar
Last Name: Mahmud
Batch No: 5
An email has been created.
--------------------------------------------------------------------------------
Creating the email #2...
Choose the type:
1.Student
2.Staff
2

First Name: Akmal
Last Name: Bek
Department ID:
1.Accounting
2.Sales
3.Marketing
4.Instructors
4

An email has been created.
--------------------------------------------------------------------------------
```

output continued below

```
1.Accounting
2.Sales
3.Marketing
4.Instructors
4
An email has been created.
--------------------------------------------------------------------------
Here are the emails that have been created:
TYPE: Student
STUDENT BATCH: 5
NAME: Bahar Mahmud
GENERATED EMAIL ADDRESS: bahar.mahmud_b5@student.duotech.io
GENERATED PASSWORD: NZ9MV2Mn
CAPACITY: 25.0 GB
